COCONUT PRODUCTS

Low Fat Desiccated Coconut

Our organic low fat shredded coconut (3% moisture content max.) derives from the dried coconut milk press cake (shredded fresh coconut meat after coconut milk has been retrieved) and therefore contains less fat (35-50%) than ordinary desiccated coconut "HFDC" that is gained by grating and drying mature coconut kernel. Low Fat desiccated Coconut is available in medium grade particle size. Exact grate measurements are available upon request.

PRODUCT SPECIFICATION

Appearance & Colour :

White, free from yellow specks

Flavour & Taste:

Milky & Sweet coconut flavour

Size : Fine granule of coconut

Physical Impurities :

Not More than 8 Pcs / 100 Gram

Total Fat: 45% +/- 5%

PH : 6.1 - 6.7

Moisture : Max 3%

PACKAGING

25 Kgs 3 Layers paper Kraft bag with inner food grade low density polyethylene bag.

SHIPMENT

20 Feet Container
(LFDC; 360 bags)

40 Feet Container
(LFDC; 720 bags)

High Fat Desiccated Coconut

Fresh coconut meat from the Eastern coasts of Sumatra is used daily to produce one of the best high fat desiccated coconut in the market. Also called shredded coconut or coconut flakes, low temperature soft drying guarantees full preservation of all its vitamins, minerals and heavenly tropical coconut taste. We do not use or add any sulfurs, preservatives or flavors, our high fat desiccated coconut is 100% natural. It is available in medium and fine particle size. High fat desiccated coconut has gained much in popularity worldwide as ingredient in many recipes such as fillings and toppings in confectionary, cakes, cookies, snack- and chocolate bars ice-cream and other desserts with a tropical "note".

Coconut Water

Among people in tropical countries with ready access to coconut palms, coconut water is renowned as a refreshing, highly nourishing drink with a delicious aroma and flavour. But, despite coconut water's potential as a competitor in the bottled beverage market, attempts to capture those qualities in a commercial product have been often unsuccessful. Once exposed to air, coconut water begins to ferment, and rapidly loses most of its flavour and nutritional characteristics. Our coconut water is carefully extracted from fresh coconuts and heat treated only for a couple of seconds in order to retain all the inherent properties of the natural coconut water including vitamins, minerals, and taste. Coco Club Coconut Water is ready to carry the best tasting coconut water to your doorstep.

PRODUCT SPECIFICATION

Appearance & Colour :

Transparent or slightly turbid no discolorations

Flavour & Taste:

Characteristic pure coconut water flavour and taste. Slightly sweet, no foreign flavour and/or taste.

Texture : Liquid with no solid particles

Total Fat: 0.1% Max

Canned Coconut Milk

Canned coconut milk is having more than a moment. Loved by paleo dieters, vegans, and foodies alike, the canned stuff can mimic milk and cream in recipes, from soup and curries to yogurt and ice cream, adding a rich milky texture without added dairy. After the coconut water is retrieved from the nut, it is de-shelled, and the brown skin shaved-off. After cleaning the white flesh with hot water steam, it is grinded and freshly pressed with a screw press. The raw coconut milk is then homogenized, filled in BPA-free cans, and sterilized. The whole process does not take more than 2-3 hours which is important to keep the freshness of the milk.

PRODUCT SPECIFICATION

Appearance & Colour :

White or slightly grayish, no discolorations.

Flavour & Taste:

Characteristic pure coconut flavour with sweet nutty taste

Texture : Creamy and liquid, solidification at temperatures below 20^o C and upper thick layer (fat contents 18% +)

Total Fat: 9 - 24% (as per customer request)

Cholesterol: 0

Transfat: 0

PH : 5.90 - 6.20

UHT Coconut Milk

Coconut milk is the only cow milk surrogate that carries the same name "milk" even though it is entirely plant based. Indeed it is white, creamy and has a rich taste. We all know that coconut milk cannot be "milked", so how is UHT coconut milk done? It is the same process as UHT cow milk but completely vegan. No animal substances involved. Fresh raw coconut milk is diluted with filtered water to get the desired fat content (18-24%). Then the creamy white and aromatic fluid passes a flash heat procedure to remove all spoilage micro-organisms. Gentle homogenization provides viscosity and smooth milk fluid filling into aseptic TetraPak Containers or in bulk aseptic bags or IBC tanks.

PRODUCT SPECIFICATION

Appearance & Colour :

White, no discolorations

Flavour & Taste:

Characteristic pure coconut flavour with sweet nutty taste

Coconut Milk Beverage

As the name suggests this coconut milk beverage is for drinking and not suitable for cooking, refine sauces or baking. Bionesia has created a wonderful dairy and lactose free coconut milk drink for the milk lover that does not want to compromise with lactose, milk sugar and animal derived fats. Not from any concentrate, Vegan and GMO free. We have emphasized on taste and creaminess to satisfy the most discerning customer. Coconut milk beverage 1 Liter contains the milk of one whole coconut and the juice of more than 2 coconuts. Enjoy the goodness of two coconuts in one container. Suitable as dairy free alternative for cereal and mueslis, milkshakes, iced coffees, lattes and teas, smoothies or frappuccinos and why not for your own creative drink?

Virgin Coconut Oil

Since its reputation as a high quality oil has been restored, natural coconut oil gained from freshly shredded dried coconut meat, is one of our most sought after products. Our coconut oil is cold pressed and untreated. We do not "RBD" refine, bleach nor deodorize it and we guarantee that our virgin coconut oil is not hydrogenized and 100% transfat free. Our virgin coconut oil is as smooth as velvet and as clear as spring water. Available in 950 ml, 620 ml, and 220 ml high quality glass jars with PVC free liner lug caps,

Coconut Flour

Used in the bakery industry or as nutrition packed topping for mueslis or cereals, coconut flour is considered a top coconut derived product. Coconut flour is gained by graining the remaining "coconut cake" after the oil has been retrieved. Coconut flour has a sweet, nutty aroma and is ivory or light cream in color. Since it doesn't contain gluten, people on gluten-free diets can substitute coconut flour in their recipe for baked goods. Coconut flour contains an astonishing 17-20% plant protein as the retrieved virgin coconut oil does not absorb any protein and is high in fiber but low in calories

PRODUCT SPECIFICATION

Appearance & Colour:

Milky white (natural chips), light brown (roasted/toasted chips)

Flavour & Taste:

Crispy characteristic coconut flavour with bit sweet roasted creamy taste

Texture: Crispy and firm

Total Fat: 6-15%

Coconut Chips

Coconut chips are a trendy oil-free snack that is made from fresh creamy coconut flesh. Our coconut chips are available just dried as "natural chips" or oven baked as "toasted or roasted chips".

Try our natural chips as a "salad sprinkler" or enrich your cereals and mueslis with some extra tropical tasty fiber. As creative toping to stir fry homemade dishes you can be sure to get extra attention from your guests. Add our oven-baked coconut chips to your own trail mix with almonds, hazelnuts, goji-berries, and raisins... and create your superfood accompanying your online work, long-haul travel or as an afternoon booster.

Coconut Whipped Cream

Coconut whipping cream is our masterpiece in dairy imitating products. Not only does it taste delicious as a topping for desserts, fresh fruit or fruit salads, cakes, ice cream, soups, shakes, and ice coffees, it is also Keto- and Whole30 friendly. Organic virgin coconut oil is the magic ingredient that enhances the creaminess and stability of the whipping cream. Coconut whipping cream has 10% less fat than its dairy counterpart and significantly less cholesterol. Our whipping cream creates a glossy, voluptuous mass and holds its shape beautifully. Coconut whipping cream is ready to replace heavy cream and will find enthusiastic followers in the vegan and non-vegan society alike.

PRODUCT SPECIFICATION
